1 // *****
2 // District, Division, or Flotilla Side Navigation Template *
3 // Side Navigation links for non-FP or Expressions Web *
4 // Created 7 Jul 2009 by WBlandy DVC-IW *
5 // *****
6
7 // -----+
8 // These declare the five arrays that hold your links and headers: no changes here
9 sn_link_name = new Array(); sn_link_addr = new Array(); sn_link_target = new Array(); sn_link_title = new Array();
10 sn_link_header = new Array();
11 // -----+
12
13 // -----+
14 // Objective: Customize the Side Nav of a website by editing and inserting Array items
15 //
16 //     Customize the Side Nav to fit your mission, Flotilla, Division or District
17 //
18 //     If it is necessary to add more Side Nav links then:
19 //
20 //         o COPY all five array items as grouped,
21 //         o PASTE the arrays in the     desired location.
22 //         o Change the array number to reflect it's location. ie,
23 //           pasted between array 4 and 6, renumber array to [5]
24 //
25 // Try not to duplicate the links located on the header and footer which resides on the National Server
26 // -----+
27
28 // -----+
29 // There are five arrays that display the links and headers located on the Side Nav
30 //
31 //     sn_link_name[n]=     Name of the link displayed on the webpage
32 //
33 //     sn_link_addr[n]=     File location or URL address of the link
34 //
35 //     sn_link_target[n]=   Left blank unless desired to open the URL link in a new page,
36 //                           window or tab, then insert a "b"
37 //
38 //     sn_link_title[n]=    If left blank then the script will insert the link name here
39 //                           - visible on Mouse over -similar to alt text
40 //
41 //     sn_link_header[n]=   Header Name to be displayed instead of a link,
42 //                           used to organize and separate links.
43 //                           When utilizing header all other fields are blank
44 // -----+
45
```

```

45
46
47 // -----+
48 // NOTE: All entrys are between quotes followed by a semi-colon
49 // -----+
50
51 // -----+
52 // A unit logo or picture can replace the AUXWEB logo located at the top of
53 // the Side Navigation bar. The dimensions of the image should be about
54 // 150x150 as that is how it will be displayed. See example below:
55 // var sn_picture_source = "http://www.cgaux.org/_images/AUXWeb_M_icon.png";
56 // -----+
57 var sn_picture_source = "http://www.cgaux.org/_images/AUXWeb_M_icon.png";
58
59 // -----+
60 // Enter alternate text for your web sites picture, for example
61 // var sn_picture_alt = "U.S. Coast Guard Auxiliary National Web Site";
62 // -----+
63 var sn_picture_alt = "U.S. Coast Guard Auxiliary National Web Site ";
64
65
66 // -----+
67 // Your first link to your home page has been entered as an example.
68 // Feel free to modify as you like..
69 // -----+
70 sn_link_name[0]= "<b>UNIT HOME</b> "; // link name, for example: Flotilla XX-X Home, Division XX Home, etc.
71 // Note that you can use any valid html tags within the quotes,
72 // try a few to experiment
73 sn_link_addr[0]= "index.html "; // link address, for example: http://www.cgaux.org/ or myflotillawebpage.htm
74 sn_link_target[0]= " "; // link target: "b" to create a new page or tab, otherwise leave this empty
75 sn_link_title[0]= "Home Page "; // link title, add a title for the link, can be left empty
76 sn_link_header[0]= " "; // Add a header to organize links when using the header leave all other fields
empty
77

```

```
78 // -----+
79 // Every other number has been skipped.
80 // This will make it easier to add a link to the middle of the list
81 // later on if needed as the links are added to the Side Navigation
82 // bar by the number appearing in the brackets.
83 // -----+
84 sn_link_name[2]= "Enter Your Link Name ";
